- **Fitting Instructions**

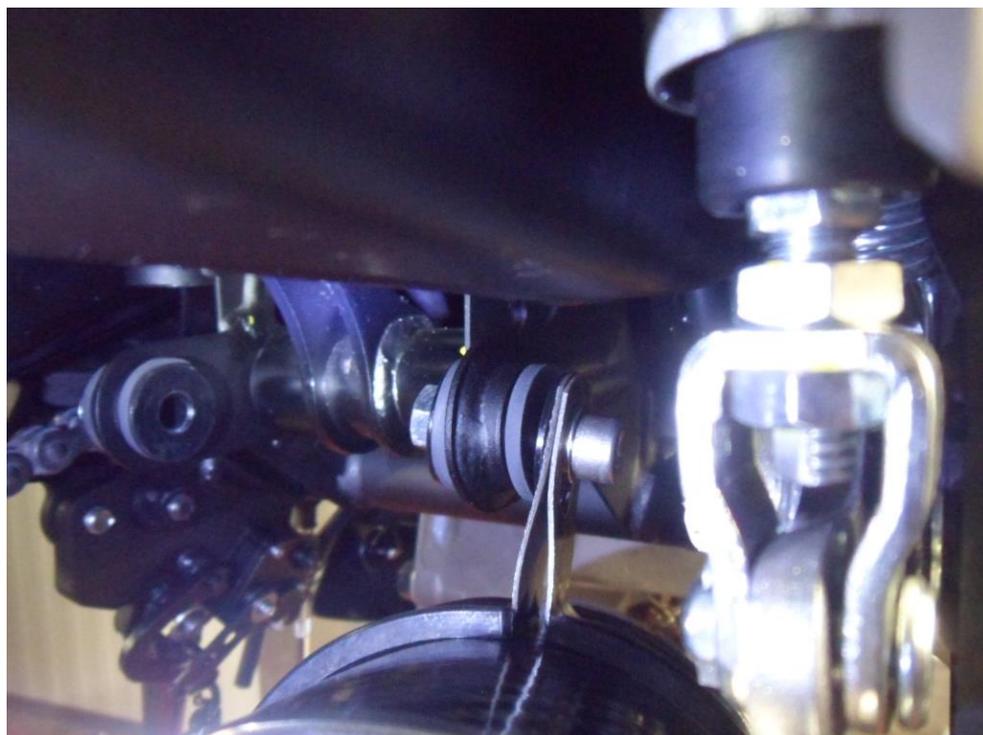

- We advise that this product is fitted by an experienced motorcycle mechanic.
- Please check packing list before you start.
- Secure motorcycle on level ground using a paddock stand. Recommended!
- Remove existing exhaust.
- Fit the new cylinder port gaskets and the header pipes finger tight, checking clearances to the plastics.

- Fit the carbon gasket on to the collector.
- Fit the clamp and insert the pipe on to the collector.

- Fit the silencer with clamp on to the link pipe and fit the strap around the silencer and to the frame.

- **Fit the O2 sensor, (if required).**

- **Starting from the front, working rearwards tighten all clamps and fasteners, double checking clearances to the plastics.**

- **Start the engine and check for leaks.**
- **After your first ride out, check all fasteners for tightness, especially the baffle bolt.**
