- **THE FITTING PROCEDURE IS THE SAME.**

- **Fitting Instructions**

- We advise that this product is fitted by an experienced motorcycle mechanic.
- Please check packing list before you start.
- Secure motorcycle on level ground using a paddock stand. Recommended!
- Remove existing exhaust system.
- Clean the cylinder ports of old gasket material, dirt and carbon deposits.
- Insert new port gaskets, holding in place with a smear of silicon.
- Fit the collector to the frame using the OEM mounting bolt.

- **Fit the 4 downpipes with carbon gaskets into the collector and the cylinder head.**
- **Starting from the front, working rearwards tighten all clamps and fasteners.**
- **Start the engine and check for leaks.**
- **After your first ride out, check all fasteners for tightness, especially the baffle bolt.**
