

## Z1000SX LINK PIPES

### Packing List:

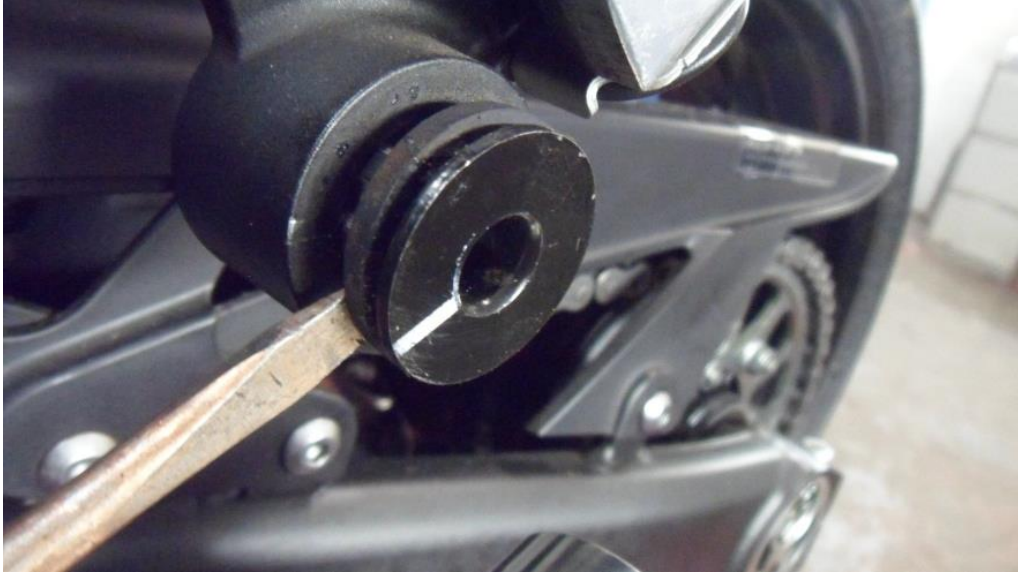

- 2X SILENCERS OF CHOICE AND STRAPS
- 2X LINK PIPES
- 1X EXHAUST SHIELD SPECIAL CLAMP
- MOUNTING HARDWARE AND SPACERS
- 2X GRAPHITE GASKETS

- Fitting Instructions.
- We strongly advise that this product is fitted by an experienced motorcycle mechanic.
- Please check packing list before you start.
  
- Secure motorcycle on level ground using paddock stand. Recommended!
- Remove standard exhausts.
- Clean collector pipes of old gasket material, dirt and carbon deposits.
- Remove original right hand collector clamp and keep safe.
  
- Flatten the small tang on the outlet and fit the special clamp as shown below.

- Insert the longest link pipe into R.H collector with new graphite gasket.
- Nip up bolt, not too tight for now just to support the pipe.

- Remove OEM rubber bushes from the frame.

- Replace with spacers as shown.

- **Fit the bracket to the spacers.**

- **Fit the strap around the silencer and to the bracket.**

**Starting from the front working rearwards tighten all clamps and fasteners.**

**Start engine and check for leaks.**

**Replace panels, seats etc.**

**After your first ride out, check all fasteners for tightness, especially the baffle bolts.**
