- **Fitting Instructions**

- We advise that this product is fitted by an experienced motorcycle mechanic.
- Please check packing list before you start.
- Secure motorcycle on level ground using a paddock stand. Recommended!
- Remove seats and seat cowl.
- Remove standard silencers.
- Clean the collector outlet pipe of old gasket material, dirt and carbon deposits.
- Fit the clamp and insert the pipe on to the collector.

- Fit the drop brackets to the frame.

- Fit the silencers with clamps on to the link pipes and fit the straps around the silencers and to the brackets.

- Starting from the front, working rearwards tighten all clamps and fasteners.
- Start the engine and check for leaks.
- After your first ride out, check all fasteners for tightness, especially the baffle bolts.
