- **Fitting Instructions**

- **We advise that this product is fitted by an experienced motorcycle mechanic.**
- **Please check packing list before you start.**
- **Secure motorcycle on level ground using a paddock stand. Recommended!**
- **Remove existing exhaust system.**
- **Clean the cylinder ports of old gasket material, dirt and carbon deposits.**
- **Insert new gaskets into the ports using a small amount of silicon sealant to hold in place.**
- **Attach number 1 and 2 downpipes to the head finger tight and attach collector.**
- **Fit number 3 then 4 downpipes into the collector and cylinder head ports.**

- **Fit the brackets onto the silencer.**

- **Fit the silencer to the collector and to the frame.**
- **Starting from the front, working rearwards tighten all clamps and fasteners.**
- **Fit the collector springs.**
- **Start the engine and check for leaks.**
- **After your first ride out, check all fasteners for tightness, especially the baffle bolts.**
